## EXPOSED FOODS TO BE COVERED

### List of Market Products Which Must Be Protected From Insects.

Exposed meats in the public markets are now to be protected from flies and other insects, as a result of the work of Doctor Blumhard, territorial entomologist, and the publication of his new treatise in "The Advertiser." Doctor Mackall, city physician, has drafted an ordinance, which will be presented to the next board of supervisors meeting, and is probably passed. The ordinance proposed follows:

Section 1. It shall be unlawful to expose for sale, or to sell from any stock in trade, within the City and County of Honolulu, any food or foodstuffs for human consumption of the names and descriptions hereinafter mentioned unless such food or foodstuffs shall be protected from contact of, and contamination by, flies and other insects in the manner or manners herein prescribed.

Section 2. The food or foodstuffs which shall be protected as herein prescribed, shall comprise the following generally and specifically named and described articles, to wit:

(a) All meats, fish, birds, game and poultry, not including anything alive.

(b) All dried fruits and vegetables, all fruits and vegetables which are not sold whole, and all compounds, essences, extracts and substances derived in part or in whole from fruits, vegetables, nuts and roots, or from one or more of such sources.

(c) All the fruits, vegetables and products of land or sea called, and known by the names and descriptions here following, viz.: Apples, apricots, artichokes, berries of all kinds, cabbage, lettuce, turnips, mangos, melons, mountain apples, onions, oranges, peaches, pears, peppers, plums, radishes, tomatoes, turnips and other plants sold fresh which do not have their surfaces removed before eating.

(d) Butter, cheese and other dairy products.

(e) Breads, cakes, candies, ice cream and other bakery or confectionery products.

Section 3. All food and foodstuffs shall be protected from contact of, and contamination by, flies and other insects by means of screens of bronze or other monel-molybdenum wire not less than sixteen (16) mesh, and made of wire not finer than No. 28, or screens or covers of any description which the city and county physician may deem suitable for their particular purpose. Any such screen may be of any form suitable for its purpose, but it shall be inserted to a rigid framework and when in place must leave at least six (6) inches of clear space between the net or its framework, at any part, and the exposed surface or surfaces of the food or foodstuffs which it protects. All such screens must be so constructed and placed as completely to prevent the contact of flies or other insects with any food or foodstuffs to be thereby protected as herein prescribed, and shall always be subject to the approval of the city and county physician and the inspection of any duly authorized food or sanitary inspector or police officer of the City and County of Honolulu.

Section 4. This ordinance shall not apply to food or foodstuffs kept or exposed for sale in undelivered original packages, unless the surface of their containers, when of the descriptions hereinabove specified, are exposed to the contact of any articles of food kept in covered or sealed containers, destined to be sold in such containers or not, provided said articles are never exposed to flies or other insects while being handled in any course of operation, nor to any food or foodstuffs kept in refrigerators in any house or other place by other means than those above.

Section 5. The provisions of this ordinance shall not apply to all meat products, including ham, bacon, sausages, etc., which are sold in packages, and which are not exposed to flies or other insects.

Section 6. This ordinance does not apply to food or foodstuffs which are not exposed to flies or other insects.
